PROFESSIONAL SUMMARY

Detail-oriented Junior Java Developer with 2+ years of experience, specializing in Java, Spring Boot, and REST API development. Skilled in SQL, SDLC, production support, and troubleshooting, with strong analytical abilities and a focus on delivering high-quality, scalable software solutions.

CORE SKILLS

- Programming & Frameworks: Java, Spring Boot, Hibernate, REST APIs,
- Databases: MySQL, PostgreSQL, Oracle
- Middleware & Administration: Tomcat, WebLogic, Middleware integration
- Other Skills: SDLC, Unit Testing, Design Patterns, CI/CD Basics

PROFESSIONAL EXPERIENCE

Associate Technical Engineer | Unisys India   **Jun 2023 – Till Date**
Bengaluru, KA

- Designed, developed and deployed Spring Boot microservices for business applications, ensuring scalability and maintainability.
- Built RESTful APIs for integration with internal and third-party systems, following secure coding practices.
- Created SQL queries, stored procedures, and triggers in MySQL to support application functionality.
- Acted as the point of contact for production issues, applying logical thinking to perform root cause analysis.
- Collaborated in an Agile environment, participating in sprint planning, daily stand-ups, and retrospectives.
- Followed Software Engineering best practices, Agile and SDLC processes using Maven, Git for version Control.
- Wrote and executed unit test tests (JUnit, Mockito) and test cases to ensure code reliability, prevent regression, and maintain software quality.

INTERNSHIP

Java application development Intern – Bionic Engineers, Bengaluru   **Sep 2021 – Dec 2021**
Bengaluru, KA

- Collaborated with a team of four members to design an E-commerce responsive website using HTML, CSS, JavaScript and ReactJS as frontend technologies.
- Developed and maintained clean and reusable code for UI components, following modern JavaScript principles, including object-oriented concepts.
- Integrating front-end development with backend systems, using an understanding of Java, Hibernate, Spring Boot framework and database concepts.

PROJECTS

- Java application development Intern – Bionic Engineers, Bengaluru
- Optimized database queries to improve performance by 30%.
- Developed APIs for product management, cart and order processing.

EDUCATION

Bachelor of Engineering (B.E.) in Mechanical Engineering   **Aug 2018 – Aug 2022**
RR Institute of Technology   Bengaluru, KA
